Upgrade work to Metung water main

Next week East Gippsland Water will be carrying out upgrade work to four kilometres of water main in Metung, to improve the efficiency of the water supply network and further boost drinking water quality for local customers.

The work will be carried out on Tuesday (18 February), with a number of air valves being replaced and water main stop valves serviced.

A letter has been sent in advance to customers affected. This includes details of a temporary shutdown to the water supply, how to prepare and what to do if you are a special needs customer.

To help minimise any inconvenience, the work will be undertaken between 10am and 3pm, which is outside the peak period of water use.

Customers with any queries about the work should contact the East Gippsland Water depot in Bairnsdale on 5152 4012.
