Orbost customers to benefit from sewer main replacement

East Gippsland Water customers in Orbost stand to benefit from the replacement of a section of aging sewer main in the town.

Work is expected to be carried out before the end of June to replace some 40 metres of sewer main along Gordon Street. This is being carried out on East Gippsland Water's behalf by Orbost Plumbing and is expected to take around three days to complete.

Said East Gippsland Water's Managing Director, Bruce Hammond: "This project will help ensure the long-term efficiency and reliability of Orbost's sewerage network. Every effort will be made to minimise any inconvenience to residents, businesses and motorists in the immediate area and we do not envisage that the project will impact on the normal operation of sewerage services.

"We thank those affected for their cooperation and anyone with queries about the project should contact Jim Russell at East Gippsland Water on 5150 4465, or email jrussell@egwater.vic.gov.au."
