Sewer relining in progress

Work is underway to clean and re-line more than 3km of sewer main around the East Gippsland region – targeting parts of Bairnsdale, Paynesville, Metung, Lakes Entrance, Orbost and Mallacoota.

Due for completion by the mid of August, the work is part of an ongoing program to boost the long-term efficiency and reliability of the region’s sewer network well into the future and is being undertaken by contractors, Rangedale.

East Gippsland Water’s Executive Manager Strategy and Assets, Lara Caplygin said, “We are making every effort to ensure we minimise any inconvenience to our customers and the public and we thank everyone for their cooperation.”

All households and businesses affected will be receiving a letter, phone call, or door knock in advance of work commencing in their particular street.

Anyone with enquiries about the program can contact East Gippsland Water on 1800 671 841.
